WHY ALUMINIUM?

Aluminium is the perfect metal to use in decoration and building materials that are exposed to weather factors at all times.

Constructions made of aluminium are firm, and strong.

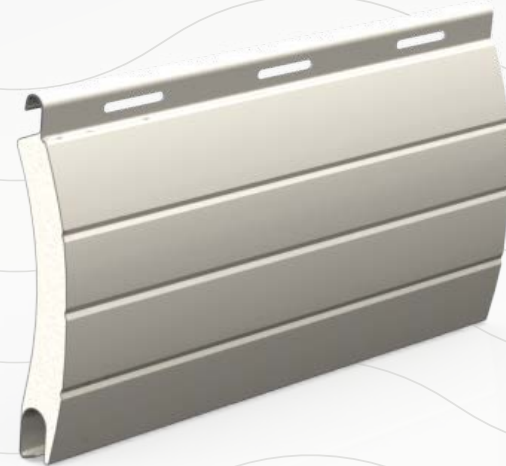

The anti-rust, anti-erosion nature of aluminium makes it ideal for use in high-moisture areas.

The aluminium used in Madar is treated in a way that ensures the colors remain bright for many years.

CUSTOM COLORS

Madar offers special colors to specifically cater to our clients' tastes after studying their requests.

FEATURES

TOTAL PRIVACY

Privacy is a necessity at home.

With aluminium rolling shutters, you can enjoy privacy at home and adjust it to your needs.

EXCELLENT WEATHER PROTECTION

Aluminium rolling shutters offer the ultimate protection from dust, dirt, rain, and sunrays to keep your room comfortably shaded, and protect your furniture and carpets from the damaging effect of the sun's ultraviolet rays.

THERMAL INSULATION

The polyurethane inside the shutter slats, and the air space between the shutter and the window lead to heat insulation. Thus, energy saving.

You can precisely adjust the rolling shutter to control sunlight or close it entirely for dimming-out.

REMOTE CONTROL

One touch!

This feature gives you the convenience of use. One touch is enough to control the rolling shutter and choose the level of lighting and protection you want for your home.
